PERSONAL PROJECTS

Legislative Referral and Endorsement Tracking System

A secure, web-based management system designed to streamline, track, and monitor the lifecycle of legislative referrals and endorsements. This system replaces slow, manual paperwork with a centralized digital workflow, ensuring transparency and accountability in legislative and administrative offices.

Legislative Backtracking System

A web application that tracks enacted legislation and traces the complete history of Local Legislation from its current state back to its original introduction.

ADDITIONAL INFORMATION

- **Languages:** English, Tagalog.
- **Certifications:** Technical Support Fundamentals – Google / Coursera
